

To Paul's Welding.

About the 1<sup>st</sup> week of June I had a need to repair done on my 2006 Winnebago Minnie Winnebago Motor home steps.

The three sided cage that holds the Electric Steps unit came apart on both sides at the seams. Since the box was made up of thin aluminum, it presented a dilemma as to best do a permanent repair it without replacing the Box completely, your crew and I put some thought together and in about an hour we were on our way to our home in St George ut.

The work was done in a timely manner the work far exceeded my expectations. We were treated like family - Thanks for treating us like a favorite customer.

Thanks & Best regards.

Sincerely

Earl & Trea Abney  
St George ut.

To Pard's Welding,

About the 1st week of June I had a need to repair done on my 2006 Winnie Minnie Winnebago Motorhome steps. The three sided cage that holds the electric steps ... came apart on both sides at the seams. Since the box was made up of thin aluminum, it presented a dilemma as to best do a permanent repair it without replacing the box completely, your [technician] and I put some thought together and in about an hour we were on our way home in St. George, UT.

The work was done in a timely manner. The work exceeded my expectations. We were treated like family. Thanks for treating us like a favorite customer. Thanks and best regards.
